

## Description

- ▲ The RAL Ladder is designed to a higher spec than most other ladders in its class.
- ▲ Fits most existing loft hatches. (See Chart below for minimum opening dimensions)
- ▲ Available in 5 model sizes to suit a floor to floor height range between 2290mm - 3660mm.
- ▲ Heavy duty loft ladder suitable for domestic, commercial or industrial use.
- ▲ High strength extruded aluminium construction.
- ▲ Spring assisted action to allow ease of operation.
- ▲ Extra wide ladder construction measuring 385mm.
- ▲ Deep non-slip treads measuring 90mm.
- ▲ Loft ladder uses spring radial arms to allow the hatch door to be opened/closed in conjunction with the lowering and raising of the ladder.
- ▲ Unit is supplied with one handrail as standard. An additional handrail is also available.
- ▲ Safe working load of 175kg.
- ▲ Complete with operating pole and fittings.

**N.B.** The RAL Ladder models do not come supplied with a trapdoor / hatch.

## Ramsay Loft Ladder Information

Model	Floor to Floor Height (C)	Storage Length Required (E)	Height Above Loft Floor Required (F)	Min Hatch Length (A)	Min Hatch Width (B)	Max Going Required (D) + (A)
<b>RAL 1</b>	2290 – 2540mm	1370mm	737mm	736mm	558mm	1310mm
